HI-LO HILL FARM

Choice Glads

"Consider the lilies of the field, how they grow,
they toil not, neither do they spin And yet I say
unto you, that even Solomon in all his glory was
not arrayed like one of these." Mat. 6:28-29.

H. O. WILKINSON

HI-LO HILL FARM

LEBANON, OREGON

Route 3

REMEMBER THY CREATOR

The picture on the front page is one of our glad fields just before it was in full bloom. The scripture verse which I have been using, is taken from our Lord's sermon on the mount. (Math. Chapters 5, 6, 7) I am constrained to give the following message, in an effort to bring some to the foot of the Old Rugged Cross, to there meet my Lord and Savior, Jesus Christ. I am remembering how Jesus said, "I must be about my Father's business." You will note that Jesus was speaking of the flower in showing His followers the great care He had for them. You would think in this day and age in which we live, that God is dead or is on a vacation. Even those who profess His name seem to be money mad and blinded by the touch of it, but He said you cannot serve God and mammon. Some who read this article will no doubt say, "I don't go to church because there are too many hypocrites there." True enough, but remember Jesus said, "Not all who say Lord, Lord, will enter in, but those who do the will of my Father." You will show wisdom in seeking His face and His will now.

The time is short, the word of God says in 2 Tim. 3:1-5 "that in, the last days perilous times shall come," men will be "lovers of pleasure more than lovers of God," they will "have a form of godliness but deny the power thereof." We are living in the most perilous day this world has ever known. The atomic bomb standing ready to wipe out, God only knows what, as men continue unconcerned, pleasure mad, determined in their own minds, but fast falling into the ways of everlasting destruction. Our churches are following after man's organisms rather than the blood bought power which Jesus gives, and emboldens us with, in His great commission, and by the Holy Ghost freely given. Are you crucifying afresh the Savior? The word also says that men will cry peace, peace in the last days. 1 Thes. 5:3, "For when they shall say peace and safety; then sudden destruction cometh upon them." Men quiver and shake, take their own lives in a last desperate effort to bring about peace, which can only come when the Prince of Peace comes. You can have peace and satisfaction now by letting Him into your heart. Not a mere head relief, but a heart transformation.

It seems unreasonable that men will not serve the Creator of this wonderful universe. He also created our own bodies. In Ecclesiastes 12:1 we read, "Remember now thy creator." In the last verse of the same book and chapter we read, "For God shall bring every work into judgment, with every secret thing, whether it be good, or whether it be evil." Friends, do you think you are hiding your life from God, or that God does not know all about you? Remember, He holds the reins. The time will come when all your deeds will be revealed. The blood of Jesus Christ is the only blotter. I plead with you, if you do not know the Savior, to turn from your wicked ways, or from a church creed, lodge, money, position, and put your trust in a living, loving Savior. He stands with outstretched arms to receive you. Turn to Him today. He will make your flower garden more beautiful than ever before, even the birds will have a far sweeter song, and you too will have a new song. He says S. of S. 2:1, "I am the Rose of Sharon and the lily of the valley;" 2:16 "My beloved is mine, and I am his; he feedeth among the lilies."

H. O. WILKINSON.

GLADIOLUS CULTURE

BULB STORAGE: Bulbs must be stored so air can circulate among them. When your shipment of bulbs arrives, open the bags to allow air to get to them and if not ready to plant, store in a cool, dry place, preferably about 40° to 50°. Bulbs will freeze below 28°, and may start to sprout if temperature is too high.

PLANTING SPOT: Select a spot as far from trees and buildings as possible. Trees draw the moisture and buildings reflect the heat, or shade too much.

SOIL PREPARATION: Spade deep and add plenty of DECAYED cow manure, if you can get it, otherwise use a complete artificial fertilizer such as Vigoro. Dig your trench 7" deep, put the fertilizer in the bottom of this and cover with approximately 2" of soil, upon which to plant your bulbs. This puts the bulbs five inches below the surface. Do not plant bulblets this deep. The depth may vary according to the weight of the soil and size of bulb. For show spikes space from 8 to 10 inches, we plant much closer than this. Glads need root room to develop good spikes.

WATER is as necessary as sunshine in growing choice glads. There may be enough rain in early season but soak them down good in August, or as soon as needed. A light sprinkling may do more harm than good, as it tends to draw the roots to the hot surface. Keep moist until the flower is cut.

CUT FLOWERS: Cut when first bloom opens and develop indoors. You may enjoy the spike a long time because a good variety opens every bud in water. Leave at least four leaves on the plant to develop the bulb for next year.

THRIP IS THE MAIN INSECT PEST. Thrip is a tiny insect, a mere speck which sucks the life juice from the tender flower buds before the spike emerges from the plant. The result is a poor spike, or one whose buds fail to open properly, or with mottled injured bloom.

THRIP CONTROL: Since all people do not kill thrips on their bulbs before planting, you may still get thrip from other gardens. To be on the safe side, start spraying your plants when 4 to 6 inches high, every week with a Tartar Emetic Spray, composed of 1 ounce Tarter Emetic dissolved in 3 gallons of water, and add ½ pound of brown sugar. Cover entire plant with a fine spray, but not enough to run off. If rain washes off the spray you must repeat. New experiments show that 1% to 5% DDT dust used in small dust gun, which will make a dust fog, is being used to kill thrips on growing plants and also in bulb storage. DDT spray form also used for growing plants. Use weekly the same as Tarter Emetic.

DISEASE CONTROL: New Improved Ceresan is one of the best disinfectants against rot and will also kill thrips. 1 oz. N. I. Ceresan, 3 teaspoons Grosselli Spreader Sticker or other spreader to 3 gal. of water. Soak 15-30 minutes keeping bulbs well stirred. Plant the same day as dipped. We have used this treatment.

CULTIVATION: Cultivate your gladiolus frequently enough to keep soil loose and free of weeds. Cultivate soil after each rain or watering to keep surface from baking. Don't cultivate too deeply; two inches is deep enough and will not disturb roots.

PLANTING TIME: The time to plant glads depends upon the variety, size of bulbs, time you desire blooms, and your local climatic conditions. Therefore I do not set any fast rule as to when to plant. I may say you can plant as soon as the earliest garden seeds start to grow, and on and until the first of July. I advocate getting different sizes of bulbs for a prolonged blooming season.

PLEASE READ CAREFULLY

If you do not read the following instructions you cannot make out an order intelligently.

MAKING OUT YOUR ORDER: Put everything down as listed in price list, add it up, figure out the extra discount and add extra bulbs of your own choosing. Or leave the extras to us and we will try to please you.

ACKNOWLEDGING ORDERS: We will acknowledge your order as soon as possible after receiving it, within ten days if not sent out by that time. If you do not hear from us within this time, drop us a line.

TERMS: Cash up to \$5.00, or 25% with order, balance C.O.D. on larger orders. We pay postage on all retail orders.

DELIVERY: Can be made any time after the first of the year if it is not freezing weather or other conditions do not hinder. Most orders will be sent out after the first of February unless you otherwise specify. We put out orders as late as June first last year. We would appreciate however if you put your orders in before April first as we try to be well on our way planting by that time.

SMALL ORDERS PLEASE NOTE: We will fill any size order you may send us. However, for all orders under \$2 please send 25c extra to pay for packing and postage. No discount can be given for orders up to \$3 as there is very little profit in such orders.

DISCOUNT EXTRAS on cash orders:

10% on orders of \$3 to \$10

15% on orders of \$10 to \$20

20% on orders over \$20

DISCOUNTS do not apply to collections, special offers or wholesale prices, or those marked "No Discount."

NO DISCOUNT: Varieties starred (*) will not be discounted or used as extras. We have a very limited stock of these varieties so order early.

QUANTITY REDUCTIONS: You may receive ten bulbs of one size and variety for 8 times the list price, or one hundred for eight times the ten rate, except wholesale, collections, and those marked "No Discount."

For example: Big Top

1 large bulb @ 15c

10 large bulbs @ 8x15c — totals \$1.20

100 large bulbs @ 8x\$1.20 — totals \$9.60

EXTRA COUNT: We practice giving extras on larger sized orders. We aim to please our customers.

SUBSTITUTIONS: Please state if we may substitute size or variety if we are out of what you order. We will substitute that of equal value or more if no statement comes with order and we are out of what you order.

CHANGES IN LISTING: Last year we listed our bulbs at so many for 25c, we find it better to list them at so much each. We have some of the small bulbs listed as low as 2c. Now it is not possible for us to separately label a large order (one bulb each) of 2c bulbs; therefore we ask your cooperation, please do not make out an order of any one variety for less than 20c. For example, Albatross is listed: lg. 8c, med. 6c, small 3c. You may order 1 lg., 1 med. and 2 small, which totals 20c. Or you may order 3 lg. totaling 24c, 4 med. totaling 24c, or 7 small totaling 21c. You may mix the size any way you like but please do not ask us to put out orders of one variety for less than 20c.

NOTE

WHEN BUYING BULBS: Price does not mean everything, some of the old varieties still cannot be discounted. The newer varieties, however, are nearly all real beauties. We would suggest buying bulbs of different sizes of the same variety for a prolonged blooming season. It takes the smaller bulbs longer to bloom, they do not bloom an exhibition flower, but they do mature a fine bulb for the next season. About 75% of small bulbs will bloom under ordinary conditions. Different varieties also bloom at different times.

PRIZE WINNERS: We are listing around 170 varieties this year. We have checked and found that 91 of these varieties drew at least three blue ribbons in 1946 Glad Shows. We list here 18 of the top winning 22, which drew from 30 blue ribbons up to 112 each.

Variety	Blue Ribbons	Variety	Blue Ribbons
1 Leading Lady	112	11 Myrna	43
3 Elizabeth the Queen	80	12 Greta Garbo	40
4 Corona	79	15 Blue Beauty	37
5 Picardy (Introduced in '31)	78	16 Spotlight	35
6 Burma	57	17 Bit O' Heaven	34
7 Algonquin	53	18 Minuet (Introduced in '22)	34
8 Black Opal	52	20 Beacon	32
9 Vagabond Prince	49	21 Big Top	30
10 Margaret Beaton	47	22 Chaumony	30

NEW VARIETIES: Many of these are real winners and outclass the old varieties, but the price is still too high and they are also too scarce for popularity. Get in on the ground floor with some of the new varieties.

SATISFACTION GUARANTEED: We mean this, if at any time, either after receiving the bulbs, or even after blooming, you feel there is ample room for complaint, just write us about it and we will do our best to make it right. We cannot, however, guarantee perfect blooms as many things beyond our control might happen, but if you feel the trouble was in the bulbs, let us know.

MISLABELED VARIETIES: We take all precautions to keep our varieties true to name, but in spite of this an occasional rogue may get in. If by any chance you receive a mislabeled bulb we will do our part to make it right.

BULBLET GERMINATION: We do not guarantee the germination of bulblets, as some varieties germinate very slow while others do exceptionally well. We advocate peeling and the use of Rootone. We used this with varieties this past year, that previously had been very slow germinators, with excellent results.

All stock offered subject to prior sale or conditions beyond our control.

State Nursery License No. 1278. Stock state inspected.

NO SUNDAY BUSINESS.

BULB STOCK: Nearly all of our stock was grown on entirely new ground this year and with the favorable season we have had, we have made a fine bulb growth. Nearly all the small bulbs, No. 5s and 6s, we planted made Jumbo bulbs. We have been hindered in our digging operations, with around 12" of rain in October. At this date, the first of November, many of our bulbs are still green, with no frost as yet; although we do have many dug and cured, and some cleaned. We have been doing all of this work by hand and while it is a slow process it assures you of good bulbs. We had practically no disease or thrips in our plantings this year.

COLOR AND SIZE CLASSIFICATION

Due to requests, which we appreciate very much, we add the following plan to our catalogue.

By using classification numbers we are able to give you in a single line the data which would otherwise take up much space. We have completed our list to the best of our knowledge and ability, but which we realize may need some corrections in the future. If you find any mistakes or misrepresentations we assure you they are accidental and we request and appreciate your cooperation in their correction, also any helpful suggestions are always appreciated. For example, the first two varieties listed are Albatross and Alpine. Both are in the 400 class. The first figure (4) indicates size of floret, at least $4\frac{1}{2}$ " up to $5\frac{3}{8}$ " across. The second figures "00" indicate color is white without markings. Ariadne (401) is another example. "01" shows it has conspicuous color marking. An odd number always denotes deeper markings. The 500 class is pure white, the "5" denoting the giant class, with florets larger than $5\frac{3}{8}$ " across, sometimes reaching $7\frac{1}{2}$ ". Our few words of description such as ruffled, tall clear, exhibition, etc., gives you a good idea of what you are ordering.

SIZES:

Miniature Class	100—Florets under $2\frac{1}{2}$ inches
Small	" 200— $2\frac{1}{2}$ inches thru $3\frac{1}{4}$ inches
Medium	" 300—Above $3\frac{1}{4}$ thru $4\frac{3}{8}$ inches
Large	" 400— $4\frac{1}{2}$ thru $5\frac{3}{8}$ inches
Giant	" 500— $5\frac{1}{2}$ inches and larger

COLOR CLASSES:

00 White without conspicuous marking	40 Pink, light
01 White with conspicuous color mkg.	42 Pink, deep
06 Cream	50 Red, light
10 Yellow, light	52 Red, deep
12 Yellow, deep	54 Red, black
16 Buff	60 Rose, light
20 Orange, light	62 Rose, deep
22 Orange, deep	66 Lavender
24 Red-orange	70 Purple
30 Salmon, light	76 Violet, light
32 Salmon, deep	78 Violet, deep
36 Scarlet	80 Smoky shades
	90 Any other color

NOTE: We list only one in the 200 class and none in the miniature class. No doubt these have their place, but we have attempted to build our stock in the larger sizes. We find the larger sizes much more popular with most people. You will also note that Vagabond Prince and Bit Of Heaven were the only two in the 300 class, which took above 30 first prizes. The rest were all large or giant size.

MINIMUM ORDER OF A VARIETY — 20c		Large 1 1/4" up	Med. 3/4-1 1/4"	Small 3/8-3/4"	Bulblets
CLASS	VARIETY				
400	ALBATROS Old favorite white	\$.08	\$.05	\$.03	100-25

COLLECTION NO. 2

100 bulbs — UNLABELED DE LUXE mixture which will contain at least 25 choice varieties, many of which would cost you much more if separately labeled. These will be hand picked from our regular storage trays.

100 large for \$10.00 — 50 large for \$5.00 — 25 large for \$2.50

COLLECTION NO. 2A. Same as collection above in medium sized bulbs.

100 medium for \$7 — 50 medium for \$3.50 — 25 medium for \$2.00

COLLECTION NO. 3

A good collection of more common varieties, which you will be proud of when they bloom. At least 20 varieties — 100 large \$5.00; medium \$3.50; small \$2.

COLLECTION NO. 4

This collection consists of rogues, unnamed seedlings, and a common mixture we grow.

100 large, \$4 — Medium, \$2.50 — Small, \$1.50

DON'T MISS THE BARGAINS ON THIS PAGE.

Free! Free! Free! Free!

With each order of two dollars or more, you send us ten names of people you think would be interested in buying glads. We will send you absolutely free \$1.00 worth of gladiolus, your own choice. Or ten cents worth for each name you might send up to ten. Do not miss this offer.

This is a picture of my brother's home and his daughter Marilyn. Note the glads in this picture. They were from our stock. We also have a planting on this farm. Beautify your home with glads.

SPECIAL

Thirty 25c packages of bulblets, each separately labeled. Catalogue value \$7.50, for only \$5.00. Your choice.

TRY SOME SEEDS

We have picked the seed from several varieties from our field. These are field pollinized by bees and humming birds. We will sell these for approximately 50 seeds for 25c. 10 packages for \$2. We will give the name of the parent stock with each package.

NOTE: We also have Wholesale Price List
